

# SLA to Lithium Battery Upgrade Kit Installation Form

This form must be sent with your ESR model for Lithium battery conversion.

A conversion to Lithium battery technology requires a reprogramming and gearing change for safe operation. Therefore this kit requires that the conversion be done at the Go-Ped® factory or by factory trained and certified technicians to insure that the conversion has been done safely for safe operation. This form must accompany your ESR for proper tracking and handling of your ESR.

**Important shipping information you must follow and understand before attempting to ship us your ESR with this form.**

**When sending us an electric ESR model there are a few important details you must understand.**

\*Cost of shipping the ESR to us will be the customer's responsibility.

\*Patmont Motor Werks and the Go-Ped® factory will assume no responsibility for damage upon arrival at the Go-Ped® factory and/or any violations or fines created by improper shipping methods. PMW will return the upgraded unit shipped in the proven and successful packaging method developed from years of experience.

\*ESR models should be shipped in a sufficient sized box with proper packaging to help prevent damage; In addition the package should not be leaking any type of fluid and/or have a strange odor of any kind.

\*The SLA (sealed lead acid) batteries are not needed and **must** be removed from the ESR to reduce box weight and potential for shipping damage. The wooden deck should be reinstalled to keep battery pan in position during transit.

\*The ESR will need to arrive complete (With exception of batteries) so that we can do a complete upgrade kit installation that includes changing gear ratios, safety check, diagnostics, and tune up.

**\*DO NOT SHIP SLA BATTERIES to the Go-Ped® factory.** This extra weight will help in reducing shipping damage issues, reduce shipping costs and you will keep your original SLA power supply package.

\*If the ESR arrives with prior damage or damage caused by shipping we will make contact with the customer to arrange for a factory repair at the customers expense. Any ESR that arrives with damage will have digital photo taken of the ESR upon arrival at our facility before any work will be preformed.

\*Only Go-Ped® brand ESR models are eligible for this upgrade, if a model is sent that is not eligible it will be sent back at the owners expense and any model that is left at our facility for more then 30 days will be considered abandoned. Abandoned model will then be recycled at a proper recycling facility.

\*PMW recommends shipping your ESR through a proper shipping facility like Kinko's FedEx, UPS Store, Mailboxes Etc. to insure proper packaging and shipping.

Please check the box next to the desired Lithium upgrade kit you are purchasing for install on the ESR.
